

WILLIAMS
JET TENDERS

Our Passion.
Your Joy.

MINI JET

MINI JET

280

A white Williams jet tender is shown from a rear-quarter perspective, moving across the water towards a rocky coastline. Three women are on board; one is at the helm, and two are seated behind her. The boat is leaving a white wake. The background consists of tall, craggy rock formations under a clear blue sky.

The world's leading jet tender specialists.

From the moment our first tender took to the waters in 1996, the Williams name has been a byword for engineering excellence and pure boating pleasure.

Since then, we've expanded the fleet so that owners of all yacht sizes can experience what it means to own a Williams.

Which, depending on your mood, might be ferrying guests in the lap of luxury. Or it might be pushing the throttle and turning your tender into a high-performance ski boat.

However you use it, every Williams tender is the result of a single goal: to make the very best boats possible so you can have the very best time on the water.

Williams Jet Tenders. Our passion is your joy.

Build your tender at williamsjettenders.com

Ensuring your tender and yacht are made for each other.

The yachting experience begins and ends with your tender. That's why every Williams tender is built to maximise comfort, style, practicality and performance – the same qualities you look for in your yacht.

But we push things a little further. Our decades-long relationships with yacht builders mean our tenders work seamlessly with their garage systems and are an ideal match for your yacht's size and performance.

Which means, not only are our tenders built with the world's best yachts in mind, the world's best yachts are built with our tenders in mind.

Punching above its weight

MINIJET

Introducing the MiniJet – Williams’ unmatched performance, reliability and stability distilled into one small but perfect package.

Lightweight and compact, the MiniJet fits any garage and many platforms on smaller yachts. This means more yacht owners can experience the quality, comfort and sheer adrenaline rush they expect from a Williams tender – but in a size they might not.

Pocket rocket.

Nothing compares to the thrill of getting behind the MiniJet's wheel. Powered by a highly efficient BRP Rotax Ace 900 engine, it will easily hit 38mph (61kph) – rare for tenders this size.

Because you're low to the water, you'll revel in every high-speed twist and turn. But thanks to its smart hull design, you can put the power down with confident, assured handling, so it's all thrills and no spills for you and up to two other passengers.

High-performance, powerful and fuel-efficient BRP Rotax engine.

Safe, high-torque jet propulsion system with no exposed propeller.

Delivers pinpoint accuracy at high or low speeds.

BRP dashboard with detailed telemetry keeps you in the know.

Power limiter switch helps new drivers learn the ropes safely.

Incredibly durable Hypalon tubes ensure your MiniJet stands the test of time.

“ I know exceptional performance when I see it, and that’s exactly what Williams has delivered.

Eddie Jordan, F1 entrepreneur and DieselJet owner.

MINI JET
280

Where other smaller tenders have to make concessions between size and performance, the MiniJet doesn't. Light, nimble and with super-responsive, pinpoint steering, it's just about the most fun you can have on the sea.

Made using durable hypalon fabric tubing, the MiniJet 280 is built to stand the test of time, proving that being small doesn't have to be a compromise.

SPECIFICATIONS

LOA
