3

The world's leading jet tender specialists.

From the moment our first tender took to the waters in 1996, the Williams name has been a byword for engineering excellence and pure boating pleasure.

Since then, we've expanded the fleet so that owners of all yacht sizes can experience what it means to own a Williams.

Which, depending on your mood, might be ferrying guests in the lap of luxury. Or it might be pushing the throttle and turning your tender into a high-performance ski boat.

However you use it, every Williams tender is the result of a single goal: to make the very best boats possible so you can have the very best time on the water.

Williams Jet Tenders. Our passion is your joy.

Build your tender at williamsjettenders.com

Ensuring your tender and yacht are made for each other.

The yachting experience begins and ends with your tender. That's why every Williams tender is built to maximise comfort, style, practicality and performance – the same qualities you look for in your yacht.

But we push things a little further. Our decades-long relationships with yacht builders mean our tenders work seamlessly with their garage systems and are an ideal match for your yacht's size and performance.

Which means, not only are our tenders built with the world's best yachts in mind, the world's best yachts are built with our tenders in mind.

Luxury, evolved.

EVOJET

The EvoJet is our largest and most advanced tender, designed for superyachts of 40m+.

Its impressive size and abundance of storage effortlessly caters for up to 13 passengers and their luggage, making tender travel for larger parties easier than ever.

And your guests will be guaranteed a refined ride thanks to the EvoJet's low-level boarding platforms and comfortable seating, as well as the smooth responsiveness of the Williams jet propulsion system.

With its unparalleled power, grace and space, the EvoJet creates a new benchmark in luxury tender travel.

When evolution is revolution.

We had a simple aim for the EvoJet: to push the boundaries of what we thought a tender could be.

The result is the EvoJet 70, a tender that carries larger groups in unparalleled comfort yet that has the power to exhilarate the second you push its ultra-responsive throttle.

The EvoJet is large but nimble, powerful but luxurious, comfortable but thrilling. A paradox, almost, and one that could only have been brought to life by our exceptional team of designers and engineers.

High-performance, 250hp Yanmar diesel engine.

Luxurious, spacious interior that carries up to 13 passengers and their belongings.

Powered by our iconic jet control system, now more responsive than ever.

Carbon fibre T-Top folds down to allow fitments into small garages

Hull designed to be supremely stable at rest, highly manoeuvrable at speed, and dry riding.

Customise your tender with a range of colour options, fittings and electronic equipment.

“ I know exceptional performance when I see it, and that’s exactly what Williams has delivered.

Eddie Jordan, F1 entrepreneur and DieselJet owner.

EVO JET 70

With the EvoJet 70, the superyacht experience begins when you step aboard your tender.

With swathes of space, 235 litres of storage, a deep hull ensuring the smoothest of rides, and a powerful 250hp Yanmar diesel engine delivering a surge of power, the EvoJet is the perfect marriage of luxury and performance.

And thanks to its tailored driving position, where a rotating helm booster means you can drive sitting or standing, you always feel in complete control.
